The Leader In Investment Education

Stock*Selection*Guide
The most widely used aid to good
investment judgment.

Company: Home Depot Inc (HD)   **Sector:** Consumer Cyclical

Home Depot, Inc., is a home improvement retailer. Its stores sell an assortment of building materials, home improvement and lawn and garden products and provide a number of services.
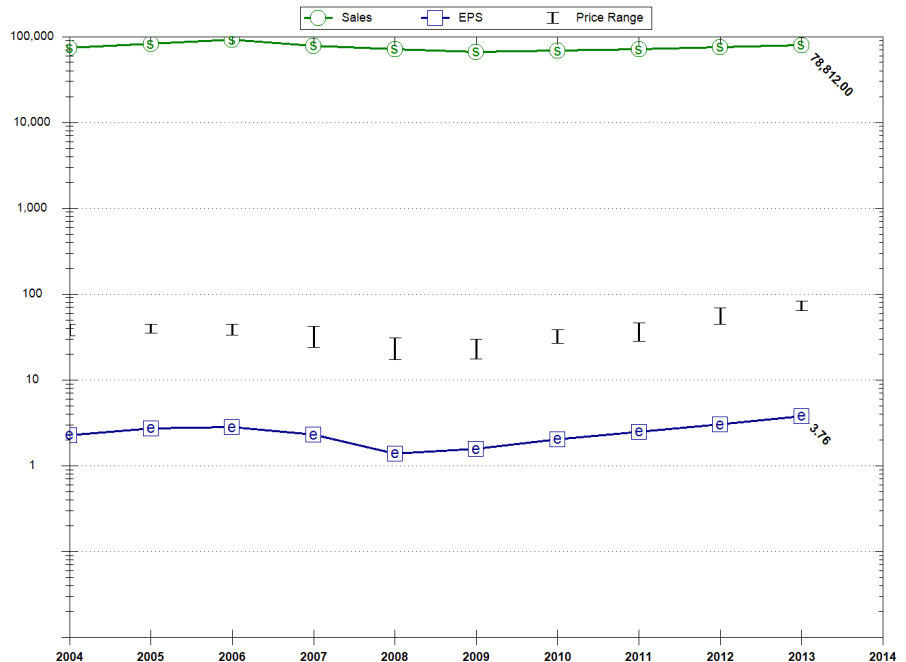

Knowledge Is the Key to Successful Investing

The core of the BetterInvesting system is this: Sales growth drives earnings growth, and earnings growth drives stock price.

Using the Stock Selection Guide (SSG), you'll forecast growth rates and determine the stock's potential high and low prices.

The SSG charts key data that helps you assess the quality and price of a particular stock.

Quality stocks will show sales (green line) and earnings (blue line) growing at a consistent, high rate. The vertical black bars record the corresponding stock price range for each year.

Use the Stock Selection Guide for 30 DAYS FREE!

Achieve Long-Term Investing Success

The SSG helps identify high-quality, well-managed companies whose stocks are selling at reasonable prices. By investing in these companies for the long term, you increase your chances of investing success.

The SSG enables you to further rate a stock by studying the company's pre-tax profit on sales, and return on equity (above). Look for a stable or growing return.

The SSG will then show you whether the stock is reasonably priced (in the Buy zone) and whether it offers a suitable risk-reward ratio.

The SSG is part of an exclusive suite of wealth-building tools that help BetterInvesting members achieve long-term investing success.

Zoning   Potential Gain Vs. Loss

Forecasted High Price

Sell 25%

The current price is
105.37

Hold 50%

Your judgment will determine the forecasted high and low prices from which the buy, hold and sell ranges are calculated.

Buy 25%

Forecasted Low Price
